

TSBC 2018 - St. Elizabeth's Medical Center

Testimonials

1. Every paramedic should attend this course – **Gary Saffer**
2. Just when I thought I sort of got it...nope. I would have liked a crash course on reading EKGs as an EMT. With limited exposure to reading them as an EMT, still found it interesting – Robin
3. Great experience, and learned a lot – **Anthony Salgado**
4. Great program – Only comment...some EKGs were hard to see – great job keeping everyone involved and interested – **Mary Ann, RN**
5. Great class – **Fred Layhorst, MSNRN, NREMT-P**
6. The TSBC 2018 was a great refresher in interpretation of EKGs. I primarily work in addiction /psychiatry as a physician assistant, and work per diem in the pre-hospital setting as a paramedic. I highly recommend this course to any healthcare provider involved in the treatment or management of the cardiac patient – **Christopher Ortiz, PA-C, EMT-P**
7. This is my third time attending this course and Dr. Prusty's love for electrocardiography is clear both from his depth and breadth of knowledge; and his evolving presentation on current approaches – **Steven Petrias**
8. Everyone was amazing – **Ann Briggs**
9. Excellent presentation...learned a lot. Would recommend again. Thanks – Kennett Dow
10. Excellent review of much more than just STEMIs. The other topics covered like HOCM, Brugada, WPW and ARVD are rarely covered in similar courses, but are just as important to recognize and are high acuity/low occurrence, thus easily forgotten – **Tom Numrych**
11. The STEMI Boot Camp course is by far the very best 12 lead cardiac course I have taken in my nursing career – **Andy Billings, RN, BSN, MICN**
